### Beyond Treble Bob on Handbells - Method progressions

#### Foundation stones:

Plain Minor methods covering most Place Notation Elements, developing the skill of following the treble, starting to associate places with treble position:

- Plain Bob: X16X16X16, 12, Bob 14, Single 1234
- Double Bob: X16X16X56, 12, Bob 14, Single 1234
- Reverse Bob: X16X16X56, 16, Bob 14, Single 1456
- S Clement's C.B. X16X36X36, 12, Bob 14, Single 1234
- Buxton Bob. X16X1236X36, 12, Bob 14, Single 1234
- College Bob X16X36X36, 16, Bob 14, Single 1456
- Single Oxford Bob X14X16X16, 12, Bob 14, Single 1234
- Double Oxford Bob X14X36X56, 12, Bob 14, Single 1234

#### Building experience:

##### Kent TB

These "Beyond TB" papers were written to help ringers approach right place methods in a structured manner. Where does Kent TB fit into the picture?

Kent TB is a valuable method and should be learned and practiced at the same time as Oxford TB. The value in Kent lies in the way it preserves natural coursing order throughout the method, and in the way it can be rung as a rule based extension of Plain Bob.

The difficulty in Kent lies with the nature of the places which are made either side of the lead end. Many ringers stumble over the places. A solution to this is to start with Kent TB Minor, and rote learn the spacing of the bells .

E.g. ringing 1-2, at the first lead end, 2 hunts out to 3rds place bell, the pair striking 1sts place and 3rds place at the backstroke. Then dodge 1-2 up & places out:

Stroke Places

H:	2&3	1 from lead, touch together
B	1&4	Lead and 2 apart
H:	2&4	1 from lead and 1 apart
B	3&5	2 from lead and 1 apart

Memorise it, ring it until it becomes automatic, repeat for all of the pairs.

Ring plenty of Kent to get the feel for Treble Bob rhythm, Minor and Major.
