

# Beyond Treble Bob

## 08:Tutor's points

---

### Points that need not get overlooked.

Introduction:

- Objective is the ability to learn 5 Major methods for handbells.
- This is one route to the goal, there will be others.
- There are key objectives, so long as these are met, the route to meeting them is unimportant.

#### 1 Basic Building Blocks

- Place notation is the way we communicate about the structure of methods, and only a part of how we learn methods.
- Plain Hunting is Fundamental to Plain Bob.
- Plain Bob is Fundamental to all that follows.
- The techniques used in ringing Plain Bob need to be extended to cover more highly structured methods.
- All PN Elements need to be covered.

#### 2 More complex methods

- Think about TB Section by section
- TB, D, S distinction.
- Rules and variations to build complex methods
- Learn Cambridge thoroughly to learn how to learn.
- Memory technique: Associate structure with Treble's position

#### 3 Ringing harder methods.

- Memorise the methods by associating the structure with the treble work.
- Apply the hunting and dodging skills to the PN elements to define the laces
- Find the places by advanced counting with thumbs

#### 4 Making the ringing secure.

- The intense concentration of 3 needs context
- Use double line shape
- Use Double Place Bell sequences
- Brain needs rest, use staging points

#### 5 Method progressions and collections

#### 6 Practice

- Mental
- Mental & physical
- Simulators
- Repetition
- Teamwork
